Magnum Optimum Optishute®: Dispensing excellence

Highest folding ratio

8 units can be folded in a standard truck, reducing the cost of reverse logistics.
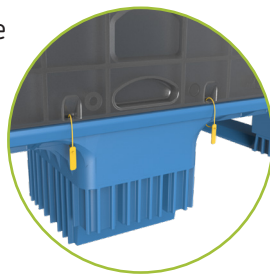

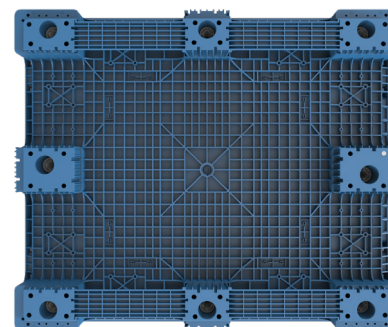

The sustainable solution for controlled dispensing

The Magnum Optimum Optishute® is a 100% reusable foldable large container featuring a special sliding door that enables the regulated flow of all types of caps and closures.
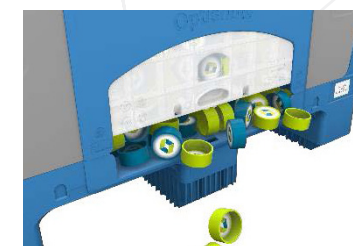

Repairable

The Bayonet closure system makes repairs easy. Machined stock panels improve the availability of spare parts.

Easy handling

Folded and erected by a single operator
Easy to empty with any type of tipping devices and compatible with most automated conveying systems. Works seamlessly with food, pharmaceutical, cosmetics, highly robotized and high-speed processing and filling lines.

Customizable

Optional label holders on both long sides and ID labels on all four sides enable easy customization.

Tamper evidence

The cable ties feature connects the base to the sliding door to provide evidence of tampering.

Unique translucent sliding door

The width and height of the door is maximised to increase flow. The sliding door is made out of translucent PP that allows operators to see the contents. The chute door can be opened in 4 positions to change the speed of discharge.

Reinforced base

Strong base ensures stackability up to 250 kg/Optishute.

Magnum Optimum

Optishute®

The only alternative to cardboard for bulk dispensing.

Usable in temperatures ranging from -20°C up to +40°C.
