Maxinest eTail®: the most efficient tote for grocery retailers

Designed for automated handling

The double skin reinforced base works perfect in automated fulfillment centers as well as for manual picking. This tote is designed for E-shopping and to hold and transport groceries and other items.

Slots for shopping bags

Two slots on each side of the crate to lock-in up to 3 shopping bags for more efficient order picking and loading of items.

Efficient & cost saving

Stack/nest container for optimised warehouse and vehicle fill, and reduces transport costs and gas emissions on return trips. Nest up to 80% with bale arm pushed back.

Size 600x400x279

The tote its total height is designed to accomodate most product SKU's, including standard US milk gallon bottles placed upright.

Food approved and 100% recyclable

Made out of EFSA food approved HDPE material.

Ventilated walls

Optimised ventilation for efficient food preservation.

Automation friendly

Double skin base works seamlessly with automatic conveyor systems.

Load capacity

Single shot moulded reinforced double base to carry loads up to 18kg.

Robust bale arm

Bale arms to support the tray when stacked. Easy to nest when arms are pushed back.

Dual height handgrips

Handgrip on the longside & a dual height handgrip on the short side makes carrying and handling easy and comfortable.

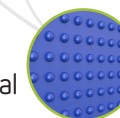

Optional ventilated dividers

Divider location for up to 3 compartments.

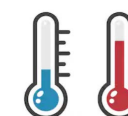

Textured sides

Pin dot texture for easy removal of labels.

Maxinest eTail®

Durable in construction, functional in design.

Usable in temperature environment of -30°C up to 40°C.
