Innovating your logistics for a better world

As the global market leader in the design and manufacture of returnable plastic packaging solutions, Schoeller Allibert is committed to reduce the logistics and packaging costs of our customers. By using our knowledge and our spirit of continuous innovation, we are dedicated to improving and optimizing our clients supply chains.

Our returnable plastic packaging systems are designed to speed up the handling and distribution operations, making the entire supply chain more efficient.

At Schoeller Allibert, we believe in making a difference for you and for your business. That is why we say that we are ''Innovating your logistics for a better world''.

Since 1985, Schoeller Allibert has innovated in partnership with the global Automotive industry to develop specific packaging solutions. These include the introduction of Galia and VDA crates and folding large containers such as our Magnum Optimum 1208. Our relentless focus on continuous product development enables us to stay at the forefront of efficiency, maximizing cost savings for today's global automotive supply chains.

InterStack is our new range of imperial stacking containers, compatible with the AIAG 48x45 inch pallet, and designed and tested in accordance with the AIAG RC-9 standards.

InterStack: The ideal stacking container for the US Automotive industry

Modular & compact

The InterStack containers form a compact handling and distributuion unit.

The full range of containers is compatible with the AIAG 48x45 inch pallet, and is designed according to AIAG RC-9 standards.

Sustainable choice

InterStack containers are fully recyclable at the end of their long working lives.

InterStack containers replace disposable packaging and therefore reduce waste and lower costs.

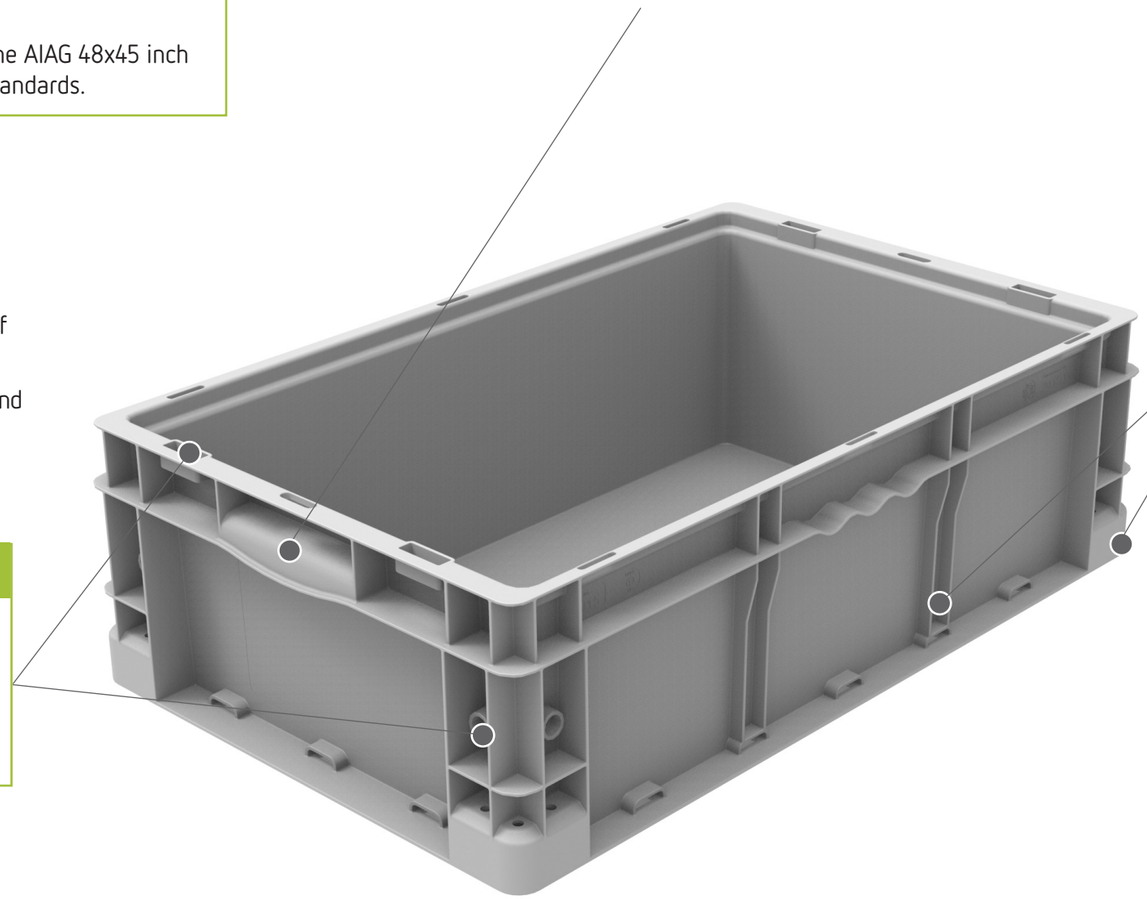
Automation friendly

Works seamlessly with automated filling, weighing, scanning and handling technology.

The containers incorporates access points for robot handling equipments, like bosses for automation and pick up holes in the top rim.

Manual handling

Recessed handholds enable comfortable and secure manual



Strong performance

InterStack is a durable, strong and impact resistant container for secure transport and storage of your products.

The double rib design on the side walls offers a high level of stacking performance in mixed stacking configurations.

The rounded corners improve strength, resistance and ensure smooth changes of direction on conveyor systems.

Flexible label holders

The InterStack range features label holders that easily attach to the container using special connectors.

The label holders can be fitted on both the short sidewall and the long sidewall, in three different positions.

For identification of contents and the container destination, two versions of click-on label holders are available, either with wide (suitable for larger card sizes) or narrow (suitable for smaller card sized) fingers.

Branding & labeling

It is possible to brand your InterStack container by using your own company color and logo.

You can use label placards, or the optional textured surface that ensures the easy removal of adhesive labels.

InterStack

Imperial stacking container range

Industry standard stacking container for the US automotive industry: adaptable, adjustable, safe and reliable.
